

## Waiward Industrial Awarded Hatch Contract at The Mosaic Potash Esterhazy K1 Production Facility

**October 18, 2022, Edmonton, AB** — Waiward Industrial LP. has been awarded a contract by Mosaic's agent, Hatch, for detailing, supply, steel fabrication, painting, and construction of the No.3 Compaction building located at the Mosaic Potash Esterhazy K1 production facility, located in Esterhazy, Saskatchewan.

Esterhazy is home to Mosaic's K1 and K2 mills and K3 mine in one of the best ore deposits in the world. The K1 site, named after the element symbol for potassium 'K', has supplied potash to global customers for decades. Esterhazy processes its potash into a variety of products including Ag White, Crystal, Granular and Standard MOP (muriate of potash) products.

For the No. 3 Compaction Building project, approximately 1,400 MT of steel will be fabricated and painted at our Edmonton facility in December and will be completed in April 2023. Then it will transition to our construction team, which will begin mobilizing in January 2023 and complete in June 2023.

"We are honoured with the confidence the Mosaic Potash Esterhazy Limited Partnership has shown in Waiward Industrial LP. This award serves as a strong testament to the capabilities of Waiward Industrial."

— **Andy Brooks, CEO, Waiward Industrial**

### About Waiward Industrial

For 50 years, Waiward has been a premier provider of engineering and drafting, fabricated steel, construction, and sustaining capital and maintenance services. We operate across Western Canada and provide solutions to various sectors, including energy, petrochemical and refining, mining, and energy transmission markets. As one of Canada's Best Managed Companies, our commitment to our customers and partners is our highest priority, as we work to provide quality products and exceptional service that exceed expectations.

Waiward is committed to partnering with Indigenous communities to develop respectful relationships that lead to mutual benefits and a strong shared future. Together, we work to identify opportunities for collaboration that fit and support the end goal of delivering a project that has gained social license and benefits for all industry and community stakeholders.
